Starting Your Dryer

**⚠ WARNING**

**Explosion Hazard**

Keep flammable materials and vapors, such as gasoline, away from dryer. Do not dry anything that has ever had anything flammable on it (even after washing). Failure to follow these instructions can result in death, explosion, or fire.

**⚠ WARNING**

**Fire Hazard**

No washer can completely remove oil. Do not dry anything that has ever had any type of oil on it (including cooking oils). Items containing foam, rubber, or plastic must be dried on a clothesline or by using an Air Cycle. Failure to follow these instructions can result in death or fire.

Follow these basic steps to start your dryer. Please refer to specific sections of this manual for more detailed information.

1. Clean lint screen before each load. See "Cleaning the Lint Screen."
2. Place laundry in dryer and shut door.
3. Press the POWER button. Then rotate the dial or press a Time Cycle button to select the desired Auto or Time Cycle. The green settings for Auto Cycles or Time Cycles will illuminate. The estimated or actual cycle time (in minutes) will show in the display.

**To use an Auto Cycle**

NOTE: A light next to each feature will glow green when the feature is selected or will glow amber when the feature is unavailable. The light will not glow when the selection is unavailable with the cycle or option combinations selected.

- Select an Auto Cycle.
- Select DRYNESS LEVEL to adjust how dry you want the load. As the cycle runs, the control senses the dryness of the load and adjusts the time automatically for the selected dryness level.

NOTE: Most loads may be dried using Normal dryness level, which is shown in bold letters on your control panel. Symbols in the empty Dry Preferred dryness level and will use the least energy.

**To make changes during an Auto Cycle:**

- Press STOP once.
- Adjust Dryness Level.

NOTE: Dryness Level selections can be made only while using Auto Cycles. You can select a different dryness level, depending on your load, by pressing Dryness Level and choosing More Dry, Normal or Less Dry. Selecting More Dry, Normal or Less Dry automatically adjusts the estimated time needed.

Wash cycle	Bleaching	Ironing	Dry cleaning	Drying
Spring Movement Wash cycle 95°C	Delicate Movement Can be bleached in cold water	Hot iron max 200°C	Dry cleaning with all solvents	High Temp. Can be tumble-dried
Wash cycle 60°C	Do not bleach	Warm iron max 160°C	Dry cleaning with perchloride, aviation gasoline, pure alcohol, R111 and R113	Do not tumble dry
Wash cycle 40°C		Cool iron MAX 110°C	Dry cleaning with aviation gasoline, pure alcohol and R113	Lay flat to dry
Wash cycle 30°C		Do not iron	Do not dry clean	Hang to dry sun-spin-dried garments
Delicate hand wash				Dry on hangers
Do not wash in water				

Here you can download the user manuals, product data sheets and energy labels from your Ariston device. In a few moments, see the full list of product documentation<sup>3</sup> download the document you need in your language. Enter the model or <sup>3</sup> alphanumeric code (12NC / F0) of your device placed on your product's technical data plate in the fields <sup>3</sup>. <sup>3</sup> Have you lost the documentation <sup>3</sup> your Ariston device? Use <sup>3</sup> with you when you move, and you must sell this device or move it elsewhere, make sure that this booklet is supplied with the thedryer so that the new owner can be informed about warnings and suggestions about how <sup>3</sup> the device works. Read these instructions carefully; The following pages contain important information <sup>3</sup> the installation <sup>3</sup> and suggestions of how <sup>3</sup> the appliance works. - Take more dry time and, as a result, use more electricity during drying. You must empty the water container after each drying cycle. When your dryer is new, the water container will not collect water until the system is ready ... "Page 2 2GB! You must clean the filter of the fluff after each drying. If the filter is not cleaned after each drying cycle will affect the drying performance of your machine.
